

HB 287

**GENERAL LAWS**

1. After line 19, introduced

insert

"Geological mapping" means the process of creating a map on which is recorded geological information, such as the distribution, nature, and age of relationships of rock units, in which surficial deposits may or may not be mapped separately, and the occurrence of structural features such as folds, faults, and joints; mineral deposits; and fossil localities. "Geological mapping" may indicate geologic structure by means of formational outcrop patterns, by conventional symbols giving the direction and amount of dip at certain points, or by structure-contour lines.
