

HOUSE BILL NO. 1085

AMENDMENT IN THE NATURE OF A SUBSTITUTE

(Proposed by the House Committee on Agriculture, Chesapeake and Natural Resources
on January 31, 2024)

(Patrons Prior to Substitute--Delegates Rasoul and Bulova [HB 245])

A BILL to amend the Code of Virginia by adding in Chapter 3.1 of Title 62.1 an article numbered 13,
consisting of sections numbered 62.1-44.34:29 through 62.1-44.34:33, relating to Department of
Environmental Quality; PFAS; identification; monitoring; PFAS Expert Advisory Council
established; report.

Be it enacted by the General Assembly of Virginia:

**1. That the Code of Virginia is amended by adding in Chapter 3.1 of Title 62.1 an article numbered
13, consisting of sections numbered 62.1-44.34:29 through 62.1-44.34:33, as follows:**

Article 13.

Per- and Polyfluoroalkyl Substances.

§ 62.1-44.34:29. Definitions.

As used in this article, unless the context requires a different meaning:

"Committee" means the PFAS Expert Advisory Committee established in § 62.1-44.34:33.

"EPA" means the U.S. Environmental Protection Agency.

"HFPO-DA" means hexafluoropropylene oxide dimer acid.

"PFAS" means per- and polyfluoroalkyl substances, which are any fluorinated substances that
contain at least one fully fluorinated methyl or methylene carbon atom and any precursors of such
substances. "PFAS" includes HFPO-DA, PFBS, PFHxS, PFNA, PFOA, and PFOS.

"PFAS maximum contaminant level" or "PFAS MCL" means any maximum contaminant level for
any PFAS chemical or mixture of PFAS chemicals (i) established by the EPA as a national primary
drinking water regulation or (ii) for the interim period of time between the EPA's proposal and final agency
action for adopting a national primary drinking water regulation, the EPA's proposed level, provided that

27 the EPA's proposed level may be used only for nonregulatory purposes of self-reporting of manufacturing
28 or use, monitoring, and PFAS assessments as provided in this article.

29 "PFBS" means perfluorobutane sulfonate.

30 "PFHxS" means perfluorohexane sulfonate.

31 "PFNA" means perfluorononanoic acid.

32 "PFOA" means perfluorooctanoic acid.

33 "PFOS" means perfluorooctane sulfonate.

34 "VDH" means the Virginia Department of Health.

35 "VPDES" means the Virginia Pollutant Discharge Elimination System.

36 **§ 62.1-44.34:30. PFAS assessments for identification of sources of PFAS in public water**
37 **supplies.**

38 A. For every public water system serving more than 3,300 persons subject to monitoring and
39 reporting of analytical results for PFAS under EPA's Fifth Unregulated Contaminant Monitoring Rule or
40 National Primary Drinking Water Regulations (40 C.F.R. Part 141), VDH shall assist the Department by
41 on a quarterly basis transferring to the Department all validated monitoring results available to VDH under
42 such regulations or otherwise in VDH's possession that indicate PFAS MCL exceedances, including data
43 generated by VDH's independent PFAS monitoring activities or submitted by public water systems to
44 VDH.

45 B. For every public water system for which VDH has notified the Department pursuant to
46 subsection A or the public water system has directly demonstrated to the Department that PFAS in finished
47 water has been detected above any PFAS MCL using Method 533, Method 537.1, or other EPA-approved
48 method for drinking water, the Department shall develop and implement a plan to prioritize and conduct
49 PFAS assessments for identifying significant sources of PFAS in such public water system's raw water
50 source or sources.

51 C. In developing its prioritization for conducting PFAS assessments, the Department shall consider
52 (i) data and other information available from VDH regarding public water supplies, including but not
53 limited to applicable PFAS data, (ii) any data or other information submitted directly to the Department

54 by public water systems on a voluntary basis, (iii) information from consultation with VDH and public
55 water systems with finished water monitoring results above any PFAS MCL, and (iv) other data or
56 information the Department considers useful for setting priorities.

57 D. In conducting PFAS assessments, the Department shall consider the results of the self-reporting
58 process required pursuant to § 62.1-44.34:31, the results of any effluent or instream monitoring required
59 pursuant to § 62.1-44.34:32 or otherwise conducted by or available to the Department, and other PFAS-
60 related data or information the Department deems useful for identifying significant sources.

61 E. In its reports of PFAS assessments, the Department shall identify potential regulatory and
62 nonregulatory options for addressing each significant source of PFAS. The goal of such assessments shall
63 be to protect public health by reducing significant sources of PFAS in raw water sources of public water
64 systems and to ensure, to the maximum extent practicable, that the costs of public water systems are
65 minimized.

66 **§ 62.1-44.34:31. Self-reporting of PFAS manufacture and use for PFAS assessment.**

67 A. For purposes of a PFAS assessment following notification to the Department pursuant to
68 subsection B of § 62.1-44.34:30, the Department shall require any facility, if deemed by the Department
69 to be a potential source of PFAS in the public water system's raw water source, that discharges to a surface
70 water under a VPDES permit or that discharges to a publicly owned treatment works under an industrial
71 pretreatment program permit to report to the Department, within 90 days after being directed by the
72 Department, its manufacture or use of PFAS as provided in this section on a form provided by the
73 Department. Such report shall include the chemical name and the Chemical Abstracts Service (CAS)
74 number, if known or reasonably ascertainable, the amount manufactured or used in the preceding 12
75 months, and any additional information reasonably required by the Department to ascertain sources and
76 quantities of PFAS manufactured or used.

77 B. For every facility that reports the use or manufacture of one or more PFAS in accordance with
78 subsection A and that discharges to a publicly owned treatment works, the Department shall forward the
79 information provided by the facility to such publicly owned treatment works within 30 days of receipt.

80 Such reporting requirement shall not change the duty or discharge permits of a publicly owned treatment
81 works.

82 C. Any portion of a report submitted to the Department pursuant to this section may be claimed as
83 confidential by the submitter pursuant to § 62.1-44.21, except claims of confidentiality for the name,
84 address, and location of the facility. Any such claim must be asserted at the time of submission in the
85 manner prescribed on the reporting form or instructions. If no claim is made at the time of submission, the
86 Department may make the information available to the public without further notice. If a claim is asserted,
87 the information will be treated in accordance with the procedures in § 62.1-44.21.

88 D. For purposes of this section, use of PFAS (i) means intentional use of PFAS or PFAS-containing
89 substances as a product ingredient or as a production process aid or additive, such as wetting agents, fume
90 suppressants, photoresists, etchants, cleaners, coatings, surfactants, or flame retardants, and (ii) does not
91 mean use of manufacturing equipment that contains PFAS.

92 **§ 62.1-44.34:32. Monitoring of PFAS sources for PFAS assessments.**

93 A. For the purpose of PFAS assessments required pursuant to § 62.1-44.34:30, the Department
94 shall require, after three months' advance notice, the owner or operator of any of the following facilities,
95 if deemed by the Department to be a potentially significant source of PFAS in the public water system's
96 raw water source, to perform and promptly report the results as received of representative quarterly
97 discharge monitoring for an initial characterization period of one year, provided, however, that the
98 Department may discontinue remaining quarterly monitoring by a facility with proper monitoring results
99 that are below the method detection level for the first two quarters:

- 100 1. Any facility subject to self-reporting pursuant to § 62.1-44.34:31;
101 2. Any facility manufacturing PFAS, any electroplating or metal finishing facility using PFAS,
102 any semiconductor or circuit board facility using PFAS, any paper or packaging manufacturing facility
103 but only if applying coatings or treatments containing PFAS to paper or packaging products for oil or
104 moisture repellency, and any textile mills, tanneries, leather, fabric, and carpet treaters but only if applying
105 oil, water, or stain repellents containing PFAS;

106 3. Any other facility that the Department has a reasonable basis to believe may use or manufacture
107 PFAS based on the facility or activity type;

108 4. Any centralized waste treatment industrial facility;

109 5. Any industrial launderers defined by NAICS 812332;

110 6. Any facility discharging groundwater remediation wastewaters pursuant to the VPDES General
111 Permit Regulation for Discharges from Groundwater Remediation of Contaminated Sites, Dewatering
112 Activities of Contaminated Sites, and Hydrostatic Tests; and

113 7. Any airport, air base, air station, fire training facility, landfill, or other facility or site that the
114 Department has a reasonable basis to believe has significant soil or groundwater PFAS contamination
115 significantly impacting finished water levels.

116 B. For purposes of this section, using or use of PFAS (i) means intentionally using or use of PFAS
117 or PFAS-containing substances as a product ingredient or as a production process aid or additive, such as
118 wetting agents, fume suppressants, photoresists, etchants, cleaners, coatings, surfactants, or flame
119 retardants, and (ii) does not mean using or use of manufacturing equipment that contains PFAS.

120 C. For purposes of monitoring under subsection A, the applicable laboratory test method is Method
121 1633 or such other method approved by the EPA that may be allowed by the Department. Monitoring
122 reports shall include all PFAS analytes measured by the test method. For purposes of this section, the
123 Department shall not require, and the facility and its laboratory shall be exempt from, environmental
124 laboratory certification or accreditation requirements specifically for use of Method 1633.

125 **§ 62.1-44.34:33. PFAS Expert Advisory Committee; report.**

126 A. The Department, in consultation with VDH, shall establish the PFAS Expert Advisory
127 Committee to assist the Department and VDH in identifying PFAS sources through PFAS assessments,
128 associated monitoring and reporting, public and private lab testing capacity and identifying options for
129 reducing PFAS in source waters causing exceedances of PFAS MCLs.

130 B. Members of the Committee shall be appointed by the Director and shall include representatives
131 of public drinking water and wastewater system owners, representatives of public health organizations,
132 potential PFAS source categories, and conservation organizations with expertise in water treatment or

133 PFAS chemistry, and other experts as determined by the Department. Members of the Committee shall
134 receive no compensation for their service and shall not be entitled to reimbursement for expenses incurred
135 in the performance of their duties.

136 C. The Department shall convene the Committee at least two times per calendar year through June
137 30, 2027, and thereafter as the Department deems appropriate.

138 D. The Department shall report annually by October 1 on its activities related to PFAS assessments
139 and on the activities of the Committee to the Governor and the General Assembly.

140 **2. That this act shall not be construed as limiting the authority of the Department of Environmental**
141 **Quality, the Virginia Department of Health, or the owner or operator of any publicly owned**
142 **treatment works to which any user discharges wastewater, to require monitoring or reporting or**
143 **otherwise regulate the discharge of any PFAS chemicals or other pollutants under other applicable**
144 **legal authority.**

145 **3. That for public water systems for which the Department of Environmental Quality has received**
146 **notice on or before September 1, 2024, of PFAS detected above the threshold established in**
147 **subsection B of § 62.1-44.34:30 of the Code of Virginia, as created by this act, the Department shall**
148 **issue notice to applicable facilities by December 1, 2024, of required self-reporting under § 62.1-**
149 **44.34:31 of the Code of Virginia, as created by this act, and required monitoring under § 62.1-**
150 **44.34:32 of the Code of Virginia, as created by this act.**
